

## Evidence of teaching effectiveness – Open-ended student evaluations

The following section is a near-complete<sup>1</sup>, unedited compilation of my open-ended student evaluation responses in chronological order.

The evaluation questions for interpreting the student responses are:

21. In general, what did you expect from you AI (i.e., TA) when you consulted with him or her?
22. Were your expectations met? If not, what was not up to your expectations?
23. How useful to you were your AI's comments on projects and assignments?
24. Did the feedback help you improve in later assignments?
25. What suggestions do you have for your AI that would improve his or her performance in subsequent courses?
26. Please indicate you major (or intended major) and minor (if applicable).

---
